

SPECIFICATION

40FT skeleton semi trailer	
Feature:	Carry 1X20FT、 1X40FT、 or 2X20FT container
Dimension(L*W*H):	12420*2480*1540mm
Main frame:	Heavy duty and extra durability design; Opting for high tensible low carbon alloy Q345B steel; I beam welded by automotive arc-submerge process
Model:	SS9380TJZP
No. of axle:	3
Payload(kgs):	40000
Tare weight(kgs):	5600
Kingpin:	Bolt-in type 3.5" or 2"
Landing gear:	Two-speed manual operation 19"
Tire size:	12R22.5 (13 sets)
Rim size:	9.00*22.5(13 sets)
Axle:	3 Axle, 13 Tons
Suspension	Spring suspension with 8pcs of leaf spring
Brake system:	Dual line with Re-6 emergency relay valve, T30/30 air chamber, 46L air tank
Electric system:	One unit of 24V 7-pin ISO standard socket; with brake light, turn light, reverse light, side light, reflector, fog light; one set of 6-pin standard cable
Container locks	12(for 1x20GP,2X20GP,1X40HQ)
Painting:	Two coat of anti-corrosion prime; one coat of finish painting
Accessory:	One tool box; one set of standard tool

Product Photo

Advantages

1. The main frame is made of 16Mn high-tensile steel, reasonable structure, superior carrying capacity and no permanent deformation.
2. The suspension system of skeleton trailer will be designed on the strengthening device, which can greatly improve the torsional performance of the container and to prolong service life.
3. The axle, tyre and other accessories are the well-known products which supplied by the domestic and foreign professional manufacturers. It can keep a better performance for the skeleton trailers.
4. It's optional to use foreign and domestic high-tensile steel and customized sectional materials, to reduce tare weight and promote transport efficiency.
